Measuring the positive legacy of trauma. Resilience Across Contexts: Family

There must necessarily be appreciation shown for both the homogeneity and heterogeneity in coping across populations.

The Innu boy of northern Canada who leaves formal schooling at age 12 to learn traditional ways of life on the land may be living an anachronism and putting himself at risk for future success beyond his community, but his behaviour is not without purpose and meaning inside his Culture Innu Nation, While this increased the generalizability of findings, we can now look back and wonder at the validity of the and Community.

The qualitative data, in particular, was useful in understanding why children

plurality provides many avenues to resilience. As the case illustration above shows, the aspects of resilience that are most protective will influence outcomes differentially depending on the Work and context in which they manifest.
