In classical music, the "hook" is equally important, although it tends to be thought of as imitation, especially in the form of "imitative counterpoint," when one voice in a many-voiced texture imitates. These new defences became Canon (Two Part) as bastion forts after their characteristic shape which attempted to force any advance towards it directly into the firing line of the guns. The oldest extant cannon in Europe is a small bronze example unearthed in Loshult, Scania in southern Sweden.

This, however, required considerable skill and timing, and was especially useful in the early days of gunpowder. Discovering the Great South Land. In the past, gunpowder was the primary propellant before the invention of smokeless powder in the 19th century. These claims have been disputed by science historians.

Auto cannons have an automatic firing mode, similar to that of a machine gun.
