When it reaches the stratosphere it turns into sulfuric acid particles, which reflect the sun's rays, further reducing the amount of radiation reaching Earth's surface. In part, this reinterpretation of snow was the result of a new period of extremely cold weather.

However, the timing of maximum glacial advances in these regions differs so. So what lies ahead for Britain as we are increasingly battered by Siberian winds and a lack of warm sea water? For the painter Caspar David Friedrich, snow symbolised death. Instead freezing air from Siberia in the North rushes into fill the vacuum. It major differences between the various proxy reconstructions relate to the magnitude of past cool excursions, principally during the twelfth to fourteenth, seventeenth and nineteenth centuries.
