Much of this money is not allocated to the most efficient projects. The Japanese economy was not stimulated out of its recession but instead experienced the two most negative years of GDP growth in the decade. Add a tag Cancel Japan. After 10 years, there are still no signs of economic correction. No prerequisite is required. Because of the increase in bad loans with poor collateral and the fall in other asset values, increased funds injected from the BOJ or additional deposits from savers have been used to hold as cash reserves against bad loans, instead of being used to extend loans to worthy borrowers.

See general information about how to correct material in RePEc. This rational Keynesian spending programs have not only failed to pull Japan out of its recession, but they have also placed the government in a weak fiscal position and distorted the economy further away from consumer preferences. Borchardt Library, Melbourne Bundoora Campus.
