Montier makes his arguments with clear insight and spirited good humor, and then backs them up with cold hard facts. Ore-commitments to sell after a profit warning and buy 1 year later might serve us . While value investing will result in losses-absolute and relative-from time. If it takes 48 days for the patch to cover the entire lake, how long would it take for the patch to cover half the lake? Montier cites a study by Jeremy Grantham a great investor and colleague of his at GMO demonstrating that low beta stocks have outperformed high beta for decades, exactly counter to the premise of CAPM. The companies are rated based on a survey conducted by Fortune magazine on 8 attributes such as quality of management, HR skills, use of corporate assets, long-term investment value. Every serious investor should have a copy in his or her library. There are some you like to change to the United States site? Mean reversion is the rule.
